Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

 C;Complex: type VI collagen is a heterotrimer of one alpha 1(VI) chain (see PIR:CGHUIA)
Sociations among trimer amino- and carboxyl-terminal domains (with disulfide bonds).
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A;Note: engineered sequence to allow isolation of the Kunitz-type proteinase inhibitor | R;Arnoux, B.; Merigeau, K.; Saludjian, P.; Norris, F.; Norris, K.; Bjorn, S.; Olsen, O. submitted to the Brookhaven Protein Data Bank, August 1994
A;Reference number: A52812; PDB:IKNT
A;Contents: annotation; X-ray crystallography, 1.6 angstroms, residues 3106-3160
A;Note: engineered sequence expressed in Saccharomyces cerevisiae strain mt-663
C;Comment: Prolines and lysines at the third position of the tripeptide repeating unit sines are 5-hydroxylated and subsequently O-glycosylated.
C;Comment: The fibronectin type III repeat homology domain may be released during proce
